

Masters Programs & Options

The department offers the following M.A. degrees. In addition to the “single major” degrees, common double majors are listed. Students interested in a double major that is not listed (e.g., Rehabilitation and Social Psychology) should speak with the director of the relevant program(s).

Note: Any program of study (with the exception of the single major, M.A. in Social Psychology) can be planned to make a student eligible for licensing as a Mental Health Counselor in the State of Indiana. A student seeking licensure should anticipate more course hours for their degree. The difference in hours required for a licensable versus a non-licensable program is usually not large, however. Students are not required to complete the licensing option to meet the requirements of the academic degree. *Licensable and not licensable* plans of study are shown on the following pages.
