

BALL STATE UNIVERSITY

GeoMobile *Learning*

Capitalizing upon Smartphones to Examine Local Energy Systems

Have a smartphone?

Interested in energy systems on campus?

Enjoy being outside?

You are invited to participate in a usability test of a **GeoMobile** learning system that uses smartphones and a GPS app to help you locate and learn about the energy systems on the BSU campus.

**If you are a undergrad student at BSU
and own a smartphone,
please consider testing the GeoMobile system!**

In Spring 2012, participants will work in small groups for about 2.5 hours to locate and learn about 3 or 4 sites on the BSU campus. Participants will also complete a questionnaire, pre/post assessments, and an exit interview.

**Participants receive a dining meal voucher
and a USB flash drive!!**
