Global Warming NRDC Covers multiple related issues <http://www.nrdc.org/globalWarming/default.asp>

Climate Change Science Compendium 2009 The Climate Change Science Compendium is a review of some 400 major scientific contributions to our understanding of Earth Systems and climate that have been released through peer-reviewed literature or from research institutions over the last three years, since the close of research for consideration by the IPCC Fourth Assessment Report. <http://www.unep.org/compendium2009/>

The Copenhagen Diagnosis: Climate Science Report The purpose of this report is to synthesize the most policy-relevant climate science published since the close-off of material for the last IPCC report. The rationale is two-fold. First, this report serves as an interim evaluation of the evolving science midway through an IPCC cycle - IPCC AR5 is not due for completion until 2013. Second, and most important, the report serves as a handbook of science updates that supplements the IPCC AR4 in time for Copenhagen in December 2009, and any national or international climate change policy negotiations that follow.

Toxic Ignorance is Not Bliss -- Why I'm Outraged About BPA and Other Chemicals, and What We Can Do, December 7, 2009, EDF Blog Personal Nature/Dominique Browning's distinctive take on all things environmental <http://blogs.edf.org/personalnature/2009/12/07/toxic-ignorance-is-not-bliss/>

Nanotechnology Perspectives - Big Need for a Little Testing; January 2010; Scientific American Magazine; by The Editors; 1 Page(s) A decade ago the great worry about nanotechnology was that it could quite literally destroy the planet. As Sun Microsystems co-founder Bill Joy warned in his essay "Why the Future Doesn't Need Us," self-assembling nanobots could potentially spread out of our control (Mis-)programmed to replicate ad infinitum, these subsentient bots would spread across the landscape as a gray goo of devastation, consuming the earth and every unlucky creature who called it home. Nowadays we can only wish that our planet-dooming scenarios were so far-fetched. Our existential worries revolve around the all too immediate problems of global warming and disease, and nanotechnology—incorporated into improved solar panels, wind turbines or drug delivery mechanisms—could, if anything, emerge as an important tool to fight these threats.

Chemical Index Wonder whether the chemical used in your pet's flea collar is safe? Or if that sweet smell from a new shower curtain is of concern? Use our searchable Chemical Index to learn about chemicals commonly used in everyday products, find out what the health concerns and sources of exposure are, and how to stay safe. <http://www.simplesteps.org/chemicals>

Toxic Homes and Household Toxins Science Friday, December 14th, 2007 Sure, you know not to drink the drain cleaner -- but what about the less obvious toxins in your home? The Environmental Protection Agency says the air inside your house could be more polluted than the air outside. In this segment, Ira and guests talk about dangers in common household products and in the very materials that make up your house. Are there greener alternatives? Ira Flatow and guests Richard Corsi and Paul Blanc. <http://www.sciencefriday.com/program/archives/200712144>

Consumption

Buy, Use, Toss? A Closer Look at the Things We Buy (Facing the Future) is an interdisciplinary unit that includes ten fully-planned lessons. This unit is correlated with national science and social studies standards and will lead your students through an exploration of the system of producing and consuming goods that is called the materials economy. Students will learn about the five major steps of the materials economy; Extraction, Production, Distribution, Consumption, and Disposal. They will also be asked to analyze the sustainability of these steps, determining how consumption can benefit people, economies, and environments. [Free Downloads]

What's Your Consumption Factor?, New York Times, January 2, 2008, By Jared Diamond, Op-Ed Contributor, http://www.nytimes.com/2008/01/02/opinion/02diamond.html?_r=1

About Planet Green Planet Green is the first and only 24-hour eco-lifestyle television network with a robust online presence and community. Launched in June 2008, our on-air content reaches 50 million homes, offering more than 250 hours of original green lifestyle programming. Both online and on-air, Planet Green's content is entertaining, relevant, and accessible to people of all ages and backgrounds. By representing a broad range of ideas and perspectives, Planet Green is taking an active role in generating conversation and motivating individuals to take action when it comes to improving the environmental status of our planet. <http://planetgreen.discovery.com/tv/wasted/>

Nine Billion Ton Hamster Together with its partners One Hundred Months and Wake Up, Freak Out, nef uses a seemingly harmless hamster in an [animated clip](#) to highlight the dangers of endless growth on a finite planet. "A young hamster doubles its weight each week between birth and puberty," an ominous voice on the clip warns. "But if it grew at the same rate until its first birthday, we'd be looking at a nine billion ton hamster." <http://www.impossiblehamster.org/>

Household actions can provide a behavioral wedge to rapidly reduce US carbon emissions

ELI is the Efficient Lighting Initiative, an international program for certifying the quality and efficiency of lighting products. It is operated by a non-profit organization, the ELI Quality Certification Institute, for the benefit of end users, policymakers, and lighting suppliers worldwide.

<http://www.efficientlighting.net/>

The Skin Cancer Foundation Seal of Recommendation The Foundation's Seal of Recommendation is granted to sun protection products that have been reviewed by and meet the stringent criteria of an independent Photobiology Committee. <http://www.skincancer.org/seal-of-recommendation/>

U.S. Green Product Council Debated – With more than 300 different organizations claiming to certify various products and services as “green” or “sustainable,” industry leaders are pondering whether the time has come for a unified U.S. Green Product Council. June 17, 2009

<http://www.environmentalleader.com/2009/06/17/us-green-product-council-debated/>

Green Grades 2009: A Report Card on the Paper Practices of the Office Supply Sector Since 2007, ForestEthics has teamed up with Dogwood Alliance to create the *Green Grades* office supply report card to inform American consumers and large purchasers of office supply products about which **companies' paper practices** safeguard the environment and the world's forests.

<http://www.forestethics.org/green-grades-09>

Fiberlock Technologies introduced **Five Shades of Green™**. By developing products which are safer for the environment and individuals, employing better manufacturing methods, creating

products to help protect people from environmental hazards, and by taking an active role in promoting these activities, Fiberlock has defined a new standard for green that covers a broad spectrum of environmental issues. When you see a **Green Focus™ Certified** product, you know that the product has met a defined set of standards developed to meet issues raised in the Five Shades of Green™ classifications. In Five Shades of Green™, Fiberlock Technologies believes it has developed a comprehensive and measurable approach to being a green organization. It is Fiberlock's aim to ensure every aspect of environmental awareness and truly become a leader in the development of "Green" products. In order to reach this goal, Fiberlock believes they must focus on every shade of "Green" <http://www.fiveshadesofgreen.com/>

EcoLogo™ is North America's largest, most respected environmental standard and certification mark. EcoLogo provides customers – public, corporate and consumer – with assurance that the products and services bearing the logo meet stringent standards of environmental leadership. The **EcoLogo Program** is a Type I eco-label, as defined by the International Organization for Standardization (ISO). This means that the Program compares products/services with others in the same category, develops rigorous and scientifically relevant criteria that reflect the entire lifecycle of the product, and awards the EcoLogo to those that are verified by an independent third party as complying with the criteria. The **EcoLogo Program** is one of two such programs in North America that has been successfully audited by the Global EcoLabelling Network (GEN) as meeting ISO 14024 standards for eco-labelling <http://www.terrachoice-certified.com/en/>
