This project is a re-design of an Environmental Center which will be located in Goshen, Indiana. The goal of this facility is to educate the public of the environment due to the city of Goshen shifting to be a "green city". The facility is open to the public and often times city meetings and school field trips are held in the main room. The goal was to create a welcoming space with adequate display cases, information boards, comfortable seating and lots of storage for employees.
