1. Reset process
2. Data governance
   a. Need for policy revisions
   b. Committees mentioned in documentation – what do they do and who are they?
      i. Data standards
      ii. Data management
   c. Rules for discussion
      i. Levels of security and access – where they have been well defined or where data have been assigned
      ii. Roles – and associated rules for data curating
      iii. Release of unit data – addendum
         1. Governmental reports?
         2. Pres/Provost? Internally?
         3. To the media? To publications?
         4. Directory information?
      iv. Surveys - addendum
   d. Regulatory Audits, critical and sensitive data
      i. Data access
      ii. Report access
3. Sub-committees (proposed)
   a. Data quality/data dictionary (is this data standards? Data management?) – charged with leading MIDAS on the development of a data dictionary, with particular focus on existing federal and state definitions – already in place
   b. Data dashboards and portals, prioritization and communication – charged with shepherding the role-out of new reports and protocols – just convening
   c. Data warehouse – charged with developing an institutional plan for snapshotting data for use in trending and time-series analyses, with particular care in the inclusion of federal and state reports.
   d. Data auditors and wranglers (report and data access) – charged with going through all Argos users and reports and wrangling them.
   e. Survey data – charged with developing an institutional plan for surveys: to protect the community members’ privacy, to monitor survey frequency to avoid survey fatigue, and to ensure the safety of data collection and usage.
