New Business:

Per the absence of Dr. Schaible Brandon, Todd Meister is leading the meeting.

1. Data governance

2. MIDAS Steering Committee
   a. The next meeting for the MIDAS Steering Committee will be held on July 30, 2019.
      i. Discussion at the MIDAS Steering Committee will include: Tableau Rapid Start, data warehousing service/location, third party consulting to assist with data warehouse engagement, training and conferences for data warehousing, and additional Tableau licenses.
      ii. Any additional items for discussion need to be submitted to Dr. Schaible Brandon by Friday, July 19.

3. Sub-committees updates
   a. Data quality/data dictionary
      i. Data Cookbook webinar scheduled for July 23.
   b. Data dashboards and portals, prioritization and communication
      i. No new information to report. Next meeting will occur in a few weeks.
   c. Data warehouse
      i. A brief overview was given illustrating the practices of Ivy Tech Community College and Purdue University.
      ii. Taylor University could be contacted regarding data warehouse practices.
   d. Data auditors and wranglers
      i. Work is being done to clean up Argos users and reports. Unused reports will be moved and subsequently removed if they are not requested within 1 year. If reports are not withdrawn from the delete file within 12 months per an individual’s request, the report will be permanently removed. Moving forward, user information will be monitored by the data stewards with the potential for additional training and compliance annually.
   e. Survey data
      i. No information to report as the sub-committee has not met yet.
