Emerging Technology and Media Development 2017-2018

Academic Project Support Office (APSO)
The Academic Project Support Office serves the Ball State University Campus by providing creative media support for the faculty’s academic endeavors.

Digital Corps
The Digital Corps provides a unique on-campus job for undergraduate and graduate students with aspirations to work in innovative and creative fields. Digital Corps students work on real world projects from within the university and around the country in a collaborative environment. They also learn technical and professional skills that supplement the instruction they receive in traditional academic classes. Hard work and creativity are rewarded through promotions in a guild-based model – from Apprentice to Specialist to Master. Combined with the high-quality work in their portfolio, Digital Corps students are uniquely situated to impact the professional world upon graduation.
