What is Banner 9?

• Phase I - a replacement for INB (Application Navigator)
• Phase II, III... cross over into SSB functionality
• What it’s **not**:
  • A major migration/implementation
  • Changes to fundamental processes
Why...

• ...because we have to - INB (built on Oracle Forms) will no longer be supported after 12/31/18

• We gain greater flexibility
  • Browser based
  • A more modern interface
  • No more java!
Timeline

• Production (PROD) timeline
  • June 2018 – Banner 9 / Application Navigator available to Data Stewards
  • July 2018 – Banner 9 / Application Navigator available to additional users
  • September 24, 2018 – PROD Application Navigator available to all users
  • Late November 2018 – turn off INB Banner to users
  • Late December 2018 – retire INB Banner
