Associate in Science
Radiography

Professional Description
Radiographers are highly skilled professionals qualified by education to perform x-ray procedures to assist in diagnosing and treating medical conditions. The responsibilities of a radiographer can include performing radiation safety and quality control procedures; preparing and administering contrast media; operating imaging equipment; positioning patients for procedures; evaluating radiographs for diagnostic quality; providing basic nursing and medical care; and preparing data for physician interpretation. Radiographers can work in a variety of settings including hospitals, private offices, independent imaging centers and mobile and traveling services. Other employment opportunities may require additional education following the radiography programs such as corporate sales, other imaging modalities (CT, MRI, ultrasound, etc.), education and management.

Program Overview
This associate degree program prepares students for careers in Radiography. The Ball State University Radiography program is offered in cooperation with IU Health Methodist Hospital in Indianapolis. The program is divided into two phases and takes a minimum of 26 months to complete. The first, or prerequisite, phase of the program takes place on the Ball State campus and includes course work in the sciences and the University Core Curriculum program. The second, or professional concentration, phase of the program is offered in Indianapolis where medical, technical and clinical courses are taught at IU Health Methodist Hospital and other clinical settings. Upon graduation, students receive the Associate in Science Degree in Radiography. Program graduates are eligible to apply for the national certification examination administered by the American Registry of Radiologic Technologists (ARRT). Individuals who pass the examination are known as registered technologists in radiography, R.T.(R).

Clinical Settings:
- IU Health Methodist Hospital, Indianapolis
- IU Health Methodist Medical Plaza East, Indianapolis
- Hendricks Regional Health Hospital, Danville

If you are interested in this program, please download and read Radiography Policies, Procedures and Information (PDF) available on the website www.bsu.edu/radiography.

Joint Review Committee on Education in Radiologic Technology: www.jrcert.org

Application
Go online to www.bsu.edu/radiography to obtain the most current radiography program application and instructions. Only the most current application will be accepted. Complete the application, follow the instructions, and attach the required documentation. All information must be received in the Department of Nutrition and Health Science office (HB 530) no later than 5:00 p.m. local time (EST) on the first business day of February each year. Incomplete application packets may not be considered.

Selection
Applicants will be ranked using the following formula: (GPA of completed, required prerequisite courses x 8) + (GPA of completed, required prerequisite math/science courses x 17).

Program Effectiveness Data
Program mission, goals, student learning outcomes, accreditation information and program effectiveness data are located in the Radiography Program Effectiveness Data document which can be accessed at www.bsu.edu/radiography. For more information regarding program effectiveness data visit the JRCERT website at www.jrcert.org.

Program Accreditation
Ball State University is accredited by the Higher Learning Commission. The program is accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT).

Revised 04/2024. Effective Spring Semester 2024.
PREREQUISITE PHASE—24 HRS
The prerequisite phase includes 24 semester hours of general requirement credits. This phase of the program may be started during any semester; however, some courses may only be offered during certain semesters each year. All required prerequisite courses must be taken for credit on a letter-grade basis, excluding courses accepted by Ball State for advanced standing or courses designated as credit/no credit. All 8 required prerequisite courses must be completed by the end of the spring semester prior to beginning the professional concentration phase of the program. If a student is unable to complete the prerequisite requirements by the time the professional concentration phase begins due to remedial courses, major change, etc., it will be necessary for the student to wait until the following year to apply. Evidence suggests that students who repeat prerequisite radiography math/science courses more than once are unlikely to be successful in the radiography program.
