MARIELLE FRANCO: A HUMAN RIGHTS ICON FOR PEACE

While returning from a Black women’s empowerment event, Brazilian council member Marielle Franco was shot and killed on March 14th, 2018. As the only Afro-Brazilian representative in a council of 51, and only one of seven women, Franco was a champion of human rights in Rio de Janeiro. She strived to increase the rights of women, queer individuals, and favela residents, while also reducing the violence faced by these communities.

Political disarray and corruption are rampant in Brazil. The community members most affected by this violent climate are the poor, Afro-Brazilians, and women. Moreover, a disproportionate amount of violence is targeted at those living in the favelas—the poor, slum cities built into the mountainsides. Hence, the citizens of the favelas rely on gang protection to keep themselves and their families safe. Consequently, due to increased gang violence, a militant police force has descended upon the favelas; leading to the death of innumerable innocent individuals caught in crossfires.

Franco was working to reduce corruption in the Brazilian government, improve the living conditions of underserved communities, and bring a halt to police brutality in the favelas. She recognized that the intersection of race, gender, and socio-economic class led to increased violence being faced by her citizens, and she consistently strove to increase their level of well-being. Remarkably, her work improved the lives of many individuals, even though it went against the government’s corrupt and often violent practices.

With her drive and commitment, Franco was able to unite differing groups of race and class, to make real change possible. Her non-violent demonstrations, marches, and other activities emphasized peaceful resolutions to citizen issues. Her influence allowed her citizens to see that they could be united, powerful, and successful in the face of adversity. Most importantly, she believed that diplomacy and loyalty to those most affected by government policies and violence was a crucial strategy for social change.

“She was executed because she was a black favela dweller who fought against the murder of black favela dwellers” said her classmate Lua Nascimento (Freelon, 2018, par. 4).

Brazilian authorities are still unsure of who killed Franco, and due to the disarray of the country and its politics, the investigation into her murder has been mishandled. Notably, her death sparked peaceful protests across the country. It is evident that despite having served her constituency as a council representative for merely 14 months, her emphasis on peaceful conflict resolution deeply resonated with those who stood with her even after her term of office ended. Franco’s death has had a global impact, and she is an icon to underrepresented and underserved communities. She serves as an inspiration to those who fight for human rights, and to all groups who strive to make themselves heard in a peaceful and effective manner.

NATIONAL PRISON STRIKE: POWER TO THE PEOPLE

August 21st, 2018 marked an important day on the calendar of many former, and current prisons inmates. Prisons have notoriously been bashed for their use of free labor at the hands of incarcerated individuals. However, the Jailhouse Lawyers Speak (JLS), a group of incarcerated people based out of South Carolina that advocate for prisoner’s rights, called to action a 19-day nationwide strike to protest harsh prison conditions. The strike was launched on the anniversary of the death of prominent prison reform activist George Jackson and is set to end on September 9th—marking the 47th year since the Attica Prison uprising in New York. Although, the exact number of protests taking place in the United States (U.S.) is unknown, 17 states have committed to this activity.

The reasons for the current national prison strike vary. However, the leading causes strive to end “prison slavery, poor living conditions, and death by incarceration” as stated by Raven Rakia, author of Why Prisoners are Going on Strike Today (2018, par. 1). In fact, the inmates released a list of ten demands. They call for an end to over sentencing, parole denials of black and brown individuals, racist gang laws, and denied access to rehabilitation programs. They also demand that several reform acts be rescinded and that there be immediate improvements to the conditions of prisons and prison policies. Further, they urge state prisons to fund more rehabilitation services, and ensure that the prisoners receive representation and voting rights. Lastly, the prisoners are protesting the 13th Amendment which condones involuntary servitude as a part of their time in prison.

Inmates involved in this strike are striking peacefully by refusing to attend to their labor—whether that be in the kitchen or fighting deadly wildfires. Other forms of protests being held include sit-ins and hunger strikes. Amani Sawari, a spokesperson for the strike stated, “the main leverage that an inmate has is their own body” (Lopez, 2018, par. 8). By withholding their labor, inmates are retaining their most valued asset against the state. More importantly, these peaceful forms of resistance illustrate the use of non-violent protests to achieve a desired goal.

The Attica prison uprising mentioned earlier has long been considered as one of the bloodiest the U.S. has ever seen. However, much like the inmates protesting now, the inmates then were striking against being valued only for what they could do for the state. The lack of regard for their needs incited a deadly riot that is remembered for the bloodshed and not as a moment in history that could have led to monumental changes within the U.S. prison system. Thus, the cause was lost when violence ensued. Hence, as the current inmates strike in a non-violent manner, we are reminded of the power of the people, the strength in solidarity, and the possibility of change. In doing so, we can debate the effectiveness of the peaceful means being used, and value the strike for what it aims to accomplish for inmates in the U.S.
