BALL STATE UNIVERSITY

ACADEMIC POSTING

2018-2019

VOLUME XLVIII – 6.2 – FINAL POSTING PART 2

April 19, 2019

This posting may contain all or part of the following: new, revised, and dropped programs, courses and prefixes. The posting period begins April 19, 2019. If no demurrer is received within ten school days, the changes will be certified for implementation.

The effective date for implementing the undergraduate and graduate materials posted after April 19, 2019 is Fall Semester 2020.

Revised:

Bachelor of Arts language requirement

Bachelor of Arts (BA)

This degree program requires two years (or the equivalent) of study in one foreign language or American Sign Language, normally courses through the full second year level.

COLLEGE OF ARCHITECTURE AND PLANNING

Department of Architecture

Revised:

MASTER OF SCIENCE IN HISTORIC PRESERVATION, 30-36 credits

This program prepares students from diverse undergraduate backgrounds for professional careers in historic preservation. Students are provided with both a strong academic background and field experience. Graduates of the program enter a wide variety of positions in both the public and private sector. Students work closely with faculty and community partners to explore the complex challenges facing the preservation field. The program prepares students in the areas of community engagement, economic development, cultural resource management, current preservation technology and preservation policy that is culturally and ecologically responsible.

Track 1: a one-year program, consisting of a minimum of 30 graduate credits. This track is for students who already have demonstrated professional experience (e.g., minimum of two years of professional practice) or who have achieved a minimum 3.0 GPA in an undergraduate historic preservation minor, or undergraduate historic preservation major from an accredited college or

university. The director of the graduate program in historic preservation will qualify applicants.

Admission requirements

Applicants must meet the admission requirements of the Graduate School as well as historic preservation in the Department of Architecture, College of Architecture and Planning.

MINOR IN HISTORIC PRESERVATION, 15 credits

Admission Requirements

- 1) Minimum sophomore standing at BSU
- 2) Minimum 3.0 GPA

Students with a GPA of 2.99 to 2.76 must have minimum sophomore standing at BSU and be admitted by HP director based upon the following:

- 1) 1-page statement of interest
- 2) 2 letters of recommendation by current or past instructors
- 3) Admission by HP director

Students with a GPA of 2.75 or below will not be granted admission into the minor.

Department of Urban Planning

Revised:

CREDITS

MASTER OF URBAN AND REGIONAL PLANNING, 36-51 credits

The professional field of planning and the programs of the department present significant and diverse opportunities to solve the problems of communities, provide directions for them, and shape their built environments. Our profession is uniquely dedicated to the quality of life impacted by place, to visions and policy consequences that extend beyond the short term, and to problem solving that relies on multiple disciplines. Our professional values commit us to environmental sustainability, social equity, participatory democracy, and deliberate design.

Planners promote development through the implementation of plans formulated and adopted in the public interest. They perform this function in all three economic sectors—public, private for-profit, and private nonprofit. Professional career areas of opportunity include public planning and housing/community development agencies, land development and professional service firms, and community development

organizations serving neighborhoods and various public interests.

The department prepares students for these challenges by offering a rigorous course of study for the master of urban and regional planning (MURP), a fully accredited degree.

Admission requirements

Applicants must meet the admission requirements of the Graduate School and be approved by the Department of Urban Planning. International students must also meet the financial, English language, U.S. Immigration (visa), and transcript certification requirements of the Rinker Center for International Programs.

Degree requirements

Concentrations

The standard MURP concentration is a two-year, 48 credit program. The accelerated track program, available only to graduates of an urban planning baccalaureate program accredited by the Planning Accreditation Board (PAB), may be completed within one calendar year (a full academic year plus dual summer session) and requires 36 credits.

Examination

To assist in self-assessment and faculty advising, newly admitted students must complete a diagnostic examination that evaluates their planning interests, perceptions, knowledge, and skills. Before graduation students must also complete a comprehensive examination that addresses the synthesis of knowledge of greatest significance in the student's professional education. This exam assesses not only student competency and program effectiveness, but also student progress since the diagnostic exam. It is not necessary to pass the exam to receive a degree.

Capstone Project

The degree requires a capstone project of 3-6 credits to demonstrate advanced competency in the use of knowledge or to create knowledge. The project may center on a field-based project that produces a professional report (CRPR 697) or on a topic of scholarship that produces a research paper (RES 697). With faculty approval a student may engage in a creative project that produces a thesis for 6 credits (THES 698). The program's curriculum prepares students for the capstone project.

Remaining Electives

The remaining electives are to be taken in consult with the graduate faculty advisor and include requirements that some electives must be taken at the 600-level. A student who elects a 3-credit research paper or creative project must take at least one elective at the 600-level.

Credits Transferred from Prior Graduate Study
Up to 15 credits for the standard and 9 credits for the
accelerated concentration earned in prior graduate study
outside the department and not resulting in a degree may be
applied toward the MURP. Such transfer credits must have

been earned at an accredited institution, demonstrate relevancy for an equivalent course of study of the MURP program, and be approved by the department.

For students without an undergraduate planning degree accredited by the Planning Accreditation Board.

To pursue this program, students must have sufficient mathematical preparation to meet the prerequisite for ECON 221. The prerequisite for ECON 221 is a C or better grade in MATH 111 or a passing grade (D- or better) in MATH 132, 161, 162, 165, or 166 and a C or higher grade in ISOM 125. MATH 132 simultaneously substitutes for the University Core Curriculum math requirement. All students will be required to take the Major Field Test in Economics before graduation.

semester are considered to be on probationary status; any student failing a jury or not maintaining the appropriate degree program grade-point average for a second semester will be dropped from the program. Students are required to audition for all mainstage production season shows except fall of freshman year and spring of senior year. Students may opt out of auditions for Chicago Showcase, New York Showcase, and the L.A. Experience. All seniors must complete the three-credit One Person Show offered as THEA 434 in the spring of their senior year.

Students are expected to take or place out of THEA 333. The Musical Theatre BFA concentration is designed as a preprofessional, conservatory style program within a liberal arts

education. This interdisciplinary concentration requires course work in dance, music, and theatre. Curriculum and performance opportunities are designed to prepare students for careers in musical theatre and/or advanced training at quality graduate schools or conservatories. Musical theatre students are selected for this degree program by audition. In addition, musical theatre students must pass juried semester auditions in acting, dance, and singing. Students failing to pass a jury at the end of each semester are considered to be on probationary status; any student failing a jury or not maintaining the appropriate degree program grade-point average for a second semester will be dropped from the program. All students are to audition for all departmental production seasons except for fall of freshman year and spring of senior year. All seniors must take part in the THEA 434 Cabaret Class offered in the fall of their senior year.

Mathematical science students are encouraged to take CS 120 and PHYC 120. PHYC 120 satisfies the TIER 1 natural science requirement in the University Core Curriculum. Students are strongly advised to deepen their understanding of aspects of the program by selecting additional courses in areas such as business, computer science, finance, economics, or physics. By selecting additional courses appropriately, a student can earn a related minor in computer science, physics, or foundations of business for actuarial science and mathematics majors.

MASTER OF ARTS IN ACTUARIAL SCIENCE, 30-33 credits

The master's program in actuarial science provides training for careers that involve analyzing and solving financial, business, and social problems related to economic risk. The program includes course work that prepares students for the professional examinations given by the Society of Actuaries and the Casualty Actuarial Society. Students taking THES 698 are expected to make an oral presentation on their thesis topic, at the discretion of the committee.

LICENSE IN MIDDLE SCHOOL/JUNIOR HIGH MATHEMATICS, 24-31 credits

Students follow the elementary education Decision Points. *Only open to* candidates who currently hold or who are pursuing a license in elementary: intermediate education. Recommendation for middle school/junior high licensure in mathematics will be made when the following criteria are met:

- all requirements for the elementary intermediate license;
- completion of all required mathematics content courses with a grade of *C* or better and a grade-point average of 2.5 or better; MATH 161 or MATH 165, MATH 181, MATH 310, MATH 316, MATH 331, and MATH 360.
- completion of the professional education courses with a grade of *C* or better and a grade-point average of 2.5 or better; EDJH 385 and MATH 393.

- Prepare and successfully deliver a Calculus Presentation a 10-15 minute presentation on a calculus topic selected from an approved list – to two faculty members in the Department of Mathematical Sciences.
- Complete student teaching in a middle school/junior high mathematics classroom or in a grade 5 or 6 elementary school classroom.

Common core required courses, 26 credits CHEM 111 General Chemistry 1

The academic minor in Emergency Management and
Homeland Security is designed to provide students with a
program of study which focuses on skills and practices of
emergency planning and management associated with
homeland security issues. These include natural disasters,
chemical, biological and radiological incidents and acts of
terrorism. This program provides a practical approach to the
emergency management issues of preparedness, responses,
recovery, and mitigation of natural and human-caused
disasters.

MAJOR IN POLITICAL SCIENCE (BA/BS), 42-50 credits

The political science curriculum incorporates a progression of required, core, elective, and capstone courses. Students are expected to have a foundation of required and core courses before taking elective and capstone courses, including internships. It is the personal responsibility of the student to complete the listed prerequisite of any course before registering for it. Please consult with the undergraduate advisor should there be any questions about the curriculum.

Capstone requirements:

To enroll in POLS 478, internship and UCC Tier 3 capstone option, students must have:

- Declared an intent to complete the internship option upon completion of 60 credits
- Met with the internship coordinator
- Completed the Intern-Ready program

To enroll in POLS 404, senior thesis and UCC Tier 3 capstone option, students must have:

- Declared intention to complete the thesis option upon completion of 60 credits
- Met with thesis advisor
- An approved thesis proposal

All students will be required to take the Major Field Exam in Political Science before graduation.

MASTER OF PUBLIC ADMINISTRATION (MPA), 36-41 credits

495

This degree provides graduate professional education to students who wish to prepare for careers in public management at the federal, state, or local government level, with nonprofit organizations, or with private sector corporations extensively involved with government. A fulltime student can complete the MPA program, including internship, in two academic years. The requirements of the program ensure that each student will have a theoretical understanding and practical awareness of public policy and of the principles of management and administration in the public sector and nonprofit sector.

The flexibility of the program allows students to tailor an interdisciplinary curriculum to their needs, objectives, and goals. Program options include disciplinary concentrations, which allow students to combine the study of public administration and policy with course work in substantive policy areas.

Alternatively, students may choose to build a customized course of study through elective courses. Each student's background will be evaluated individually, and recommendations on program content will be made according to the student's educational and job experiences and career plans. Selection of such courses must be made in consultation with the major advisor. Students may complete part of their MPA elective courses in such departments as accounting, criminal justice and criminology, information and communication science, economics, journalism, educational leadership, marketing, management, natural resources and environmental management, social work, and sociology.

Many opportunities exist for student participation in workshops and experiential learning settings where students can interact with public and nonprofit administrators. Students without appropriate professional experience will be required to complete a full-time internship for credit.

Before graduation, all students must pass written examination, which consists of a portfolio of work that includes:

- Majors papers produced by the students in the courses in the core area of study,
- Majors papers produced to fulfill the student's research requirements, and
- An evaluative, reflective essay of 10-15 pages that describes how the process of creating this body of work has enhances the student's knowledge and competency for public service.

The MPA examination committee, consisting of three faculty members from the MPA core faculty, will review the portfolio.

- an approved application for student teaching.

Decision Point 3:

Recommendation for Graduation and Licensure

To be recommended for graduation, candidates must have:

- earned credit in student teaching;
- completed all requirements for graduation with an overall grade-point average of 2.5;
- maintained a grade-point average of at least 2.5 in all professional education courses and 2.5 in the major and in all content area courses;

In addition, to be recommended for licensure, candidates must have:

- passed the Indiana Academic Core Assessments in the appropriate Developmental (Pedagogy) Area and Content Area:
- provided evidence of current CPR/AED certification (through state approved agencies) prior to license recommendation;
- provided evidence of completion of suicide prevention training (through state approved agencies) prior to license recommendation.

Exceptional Needs: Deaf and Hard of Hearing (Graduate License)

The graduate license additional in Exceptional Needs: Deaf and Hard of Hearing is designed to prepare teachers of deaf and hard of hearing (d/hh) students K-12, across content areas, and in a variety of settings to meet the learning and language needs of d/hh learners. Students will gain a strong professional preparation and understanding of the different philosophies, theories, and evidence-based strategies that are used in deaf education. They will understand assistive technology, listening devices, and how to establish a learning environment that supports the needs of d/hh learners. In addition, students will be able to use assessments to write IEPs, collaborate with other professionals, guide instruction, and work with families.

Proof of a valid elementary and/or secondary teaching license is required. The Indiana developmental levels covered by the Exceptional Needs: Deaf and Hard of Hearing license will match the levels of coverage in the candidate's existing teaching license, unless students complete a department approved practicum to meet the requirements for licensure in all school settings (K-12). Contact the Office of Teacher Education and Clinical Practice for other requirements.
