Section III. Guiding Questions

- Are you identifying the major “push and pull factors” that are influencing candidate retention and attrition? If so, what the top three (3) reasons why candidates are leaving your EPP, though not necessarily the institution?
- Have you identified content areas with the most successful completion rates? If so, what do you think is the reason for their success and how might this help programs with lower retention rates?
- After reviewing the institutional and program attrition rates, are you able to identify whether any current efforts to retain candidates have been successful, or whether there is any need to further develop actions related retention?
