SAFETY GOALS:
Consumer safety is our number one priority. To achieve this goal, we will create one entrance to the building that the secretary and other personnel can see at all times. Creating a comfortable and accessible environment will allow occupants to relax and focus on their purpose at Easter Seals Crossroads.

CIRCULATION GOALS:
Way finding is essential in this facility. We want all spaces to be easily identifiable. Our goal is to address the needs of all disabilities when it comes to way finding. Ways to consider doing this are floor variations, signage, use of color, and murals. We want consumers to enter our facility stress free and know where they are going right way.

COMFORT GOALS:
We want the consumers to feel comfortable enough in the facility so they want to come back. We will create a warm environment to make guests feel welcome. We know appointments may take a long period of time, therefore our goal is to make the wait comfortable and memorable.

INTERACTION GOALS:
Many of the consumers at Easter Seals Crossroad have developed very strong relationships with each other. This is due to weekly appointment times and similar situations. We will create an environment that allows them to interact and further grow these friendships.

PERSONALIZATION GOALS:
We want consumers to feel that this space has been personalized to fit them. All concerns will all disabilities will be addressed. We hope to provide entertainment in the waiting rooms for all ages. These accommodations may include toys, homework stations, various sizes of seats, and other products that will enhance their treatment and experience.

OUR MISSION:
Create a space that is designed for safety and comfort for both clients and employees. Sustainable finishes and unique seating arrangements will contribute to the interactivity of the facility. Adapting the overall layout will enhance the circulation and reillustrate the functions of the lobby, waiting and study areas. By adding personalization to the areas we will be able to illustrate Easter Seals Crossroads high quality service.
EASTER SEALS CROSSROADS - 1ST FLOOR

Get rid of desks to create a more open concept with private spaces.

- Waiting area
- Reception desk switched to opposite side of waiting area
- Deaf communications

KEY:
- Deaf Communications
- Waiting Area
- Reception Area
- Donor Wall
