Primary Syllabus

A. NUMBER AND TITLE OF COURSE
Chem 375: Specialized Topics in Chemistry

B. COURSE DESCRIPTION
Discussion or experimentation, or both, in specialized topics in and related to chemistry. Information concerning specific topics that are offered during a given semester is available from the departmental office. Lecture, discussion, and laboratory schedules appropriate to the topic offered.

Prerequisite: Permission of the department chairperson.

A total of 4 hours of credit may be earned, but no more than 1 hour may be counted toward departmental major or minor requirements.

C. COURSE OBJECTIVES
The students will demonstrate an understanding through written and oral assessments of the following: (see course content in item E).

D. COURSE RATIONALE
The course is designed for exploration of special topics and may be taken by chemistry majors in the 43 hour, 34 hour, or biochemistry option programs.

E. COURSE CONTENT, FORMAT, AND BIBLIOGRAPHY

Content

Dictated by the topics selected.

Format

1-4 clock hours per week.

Bibliography

- Texts or articles corresponding to the topics selected.
